# Long-form writing

Session 2

---

---

# Today's objective

Find a topic, and download one or more articles to work from

Articles should be

- Research Articles (IMRaD format)

- In English

- No more than 1 year old for the main article, up to 3 for secondary sources

# Choosing a topic 1

## Method 1

List potential subjects

- A. Imaging techniques
- B. Drug delivery
- C. Biomimicry
- D. Gene therapy
- E. ...

Choose one and run a search on PubMed, Google Scholar etc.

# Choosing a topic 2

## Method 2

Browse

Look for open access journals which deal with your field, or journals available through the university library

Visit the BioRxiv repository

Download anything of interest
