Ted Eytan, MD, MS, MPH revised @tedeytan 10.24.2018

Maternal mortality ratio, 2015

Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births. SDG Target 3.1 is to reduce global maternal deaths to less than 70 per 100,000 live births and all countries less than 140 per 100,000 live births.

Conclusion

Physicians in the emergency room should be aware that pheochromocytoma can have varied symptoms at first.
